

What Patients Are Saying About the DRX⁹⁰⁰⁰[™]

"For years, my low back pain prevented me from doing the things I enjoyed in life. Thanks to the DRX 9000, I can now go out to watch a movie, to go out dancing, to do whatever I want without having to have to worry about my low back pain. Thank you for giving me my life back."

- Mary Caruthers
NY, NY

"I injured my back doing construction. Rather than collect disability, I was constantly taking pain killers and anti-inflammatory drugs so I could continue working on the job. When I saw the ad for treating back pain with the DRX9000 system, I was skeptical at first, but curious. I decided to give it a try and to my surprise, it worked like nothing I had ever tried before. After just one month of treatment, I felt stronger than I had in years and had the joy of throwing away all of those pain-killing drugs. One of the happiest days in my life is when I was discovered there was something that could cure my back pain. That something was your DRX9000. I cannot thank you enough for helping me and my family."

- John Volanakis
Orlando, FL

The DRX⁹⁰⁰⁰[™] is available at:

CHIROPRACTIC WORKS, P.C.

Are You Suffering From Chronic Back Pain?

If you are like many who suffer from chronic back pain, you have probably tried several prescribed remedies to help ease your discomfort. Frequent bed rest. High doses of pain medication. Perhaps even non-traditional approaches such as acupuncture. And like so many, you have come to accept the fact that you just have to learn to live with your pain.

Today, you don't have to live with that pain anymore. Thanks to the concerted efforts of a team of top physicians and medical engineers, a major advancement in medical technology was made to effectively treat low back pain resulting from herniated or deteriorating discs. The result of their efforts — the creation of the **DRX⁹⁰⁰⁰** not only significantly reduces back pain in 86% of patients, but enables the majority of patients to return to more active lifestyles.

Common Causes of Back Pain

Your central nervous system consists of the brain and spinal cord. Protecting the spinal cord are vertebrae (bones), protected in turn by discs made up of a gelatin-like substance. Functioning as a shock absorber to the bones, discs undergo tremendous amounts of stress, often resulting in a herniation or "bulging" of the disc. This is the most common cause of lower back pain.

Another common cause of back pain is disc degeneration, caused by a drying out of the disc area. Over the course of time, or through injury, dried discs will crack and induce pressure on nerves. The result is extreme muscle tension and back pain.

The **DRX⁹⁰⁰⁰** was created to effectively treat these conditions to help patients live a pain-free life.

About the DRX⁹⁰⁰⁰

DRX⁹⁰⁰⁰ uses state-of-the-art technology to gradually relieve neurocompression often associated with lower back pain. The process has been proven to relieve pain by enlarging disc space, reducing herniation, strengthening outer ligaments to help move herniated areas back into place, and reversing high intradiscal pressures through application of negative pressure.

Your **DRX⁹⁰⁰⁰** treatment begins with a series of daily sessions for two weeks, followed by treatments three times a week as needed. Each session consists of 30 – 45 minutes on the **DRX⁹⁰⁰⁰**. Following each therapy session, a cold pack with electrical muscle stimulation is applied to help paravertebral muscles consolidate after treatment.

An upper chest harness/shoulder support is used to help distribute the applied forces evenly. Once in place, you are slowly reclined to a horizontal position. Following the physician's orders, the therapist localizes the pain, makes any adjustments and directs the treatment to the proper area. **DRX⁹⁰⁰⁰** helps to mobilize the troubled disc segment without inducing further damage to the spine.

Is the
DRX⁹⁰⁰⁰
for you?

DRX⁹⁰⁰⁰ Can Help If You Have

- Herniated and bulging lumbar discs with or without complications
- Degenerative disc disease
- A relapse or failure following surgery, even with multiple levels of herniation
- Facet syndromes

What Results Can I Expect from the DRX⁹⁰⁰⁰

After only three weeks of treatment, clinical studies have shown outstanding results in relieving the debilitating pain that may be caused by bulging, herniated, degenerative, or ruptured discs, as well as sciatica, posterior facet syndrome, and many failed back surgery cases.

Pre- and post-treatment MRIs have shown greater than 50% reduction in the size and extent of herniations after four weeks of treatments with the **DRX⁹⁰⁰⁰**. In fact, during the initial clinical study more than 82% of patients report relief of back pain with the **DRX⁹⁰⁰⁰**.
